KOUSTAV ROY

Chittaranjan, West Bengal, India | +91 7602650337 | koustavroy760@gmail.com | koustavroy.vercel.app

SUMMARY

Data analyst and developer with an Electronics & Communication Engineering background, turning raw data into clear answers with SQL, Excel and Python. Ships faster with Claude, OpenAI and GitHub Copilot, and keeps data workflows running on their own with GitHub Actions. Currently completing the Data Analytics with AI & GenAI program at E&ICT Academy IIT Roorkee × Masai. Pairs analytical thinking with content and UX sense so insights are easy to act on.

TECHNICAL SKILLS

Languages:	Python, JavaScript, TypeScript	**Frontend:**	React.js, Node.js, Tailwind CSS
AI & GenAI:	Claude, OpenAI, GitHub Copilot, Cursor, Prompt Engineering	**Cloud:**	GitHub, GitHub Actions, Streamlit, Vercel, Supabase, Render
Databases:	Firebase, SQL, Excel	**Design:**	Photoshop, DaVinci, Content Strategy

EXPERIENCE

Studio Editor — May 2024 – Jul 2025

The Graduate Dropout (Podcast Channel) — *Bengaluru, India (Remote)*

- Edited long-form podcast interviews end to end, turning raw studio footage into polished episodes for a channel with a large subscriber base and popular guests.
- Wrote the vision and storyboard for interview shoots, planning episode flow and visual treatment before the cameras rolled.
- Refined visual assets and cut episodes into social media and digital campaign content.

Industrial Trainee — 2024

Chittaranjan Locomotive Works (Indian Railways) — *Chittaranjan, India*

- Trained at Indian Railways' electric locomotive production unit, gaining hands-on exposure to locomotive manufacturing processes, engineering operations and workplace practices.

PROJECTS

AI Clone Agent — 2026

Python, Node.js, Gemini, ChromaDB, Streamlit

- Exported and curated my own chat history into a personal text dataset, embedded my writing patterns, catchphrases and Hinglish into a ChromaDB retrieval layer, then wired it to Gemini to build a fully personalized real-time AI text agent that talks, thinks and replies like me.
- Engineered the full prompt pipeline, tooling orchestration and model configuration end to end, with relationship-tier routing, a contact allowlist, dry-run mode and a kill switch, focused on reproducibility and natural conversational UX.

ClinicOCR – Prescription Digitization App — 2026

React, Express, Neon, Tesseract, Gemini

- Full stack tool that parses handwritten prescriptions with Tesseract OCR and Gemini, converts them into editable digital drafts, and keeps a clinician in the loop to review and correct every record before it is saved.
- Built searchable patient history, multi-language notes and PDF export on React, Express and Neon with Clerk authentication, storing approved text records rather than the original images.

EdgeDash – Career & Job-Market Intelligence Agent — 2026

Python, Streamlit, SQLite/PostgreSQL, GitHub Actions, LLM APIs

- Built an autonomous pipeline that fetches live job listings, extracts role requirements with LLMs, scores fit against a configurable career profile using deterministic Python weights, and maps skill gaps back to real listings, running daily on GitHub Actions.
- Engineered for trust: a verifier gates every cycle before data reaches the read-only Streamlit dashboard, and natural-language queries route to typed, parameterised functions instead of model-generated SQL.

EDUCATION

B.Tech in Electronics & Communication Engineering — RCC Institute of Information Technology (MAKAUT) — 2021 – 2026

CGPA: 7.39 / 10 — *Kolkata, India*

Data Analytics with AI & GenAI — E&ICT Academy IIT Roorkee × Masai — Jul 2026 – Present

Structured program in data analytics with AI and generative AI tools — *Online*

ACHIEVEMENTS & LEADERSHIP

- Launched **Mochi**, a lightweight Chromium extension, on Product Hunt — ranked **#12 on launch day** with 107 points, with zero marketing budget and pure organic traction.
- **Runner-up** at Smart Bengal Hackathon 2023 — collaborated with a team to build and pitch a solution at RCCIIT.
- Led the **College Cultural Committee** and the cultural fest, heading most of its campaigns (2022 – 2025).
- Coordinated the **Google Developers Club** at RCCIIT: developer activities, tech events, community (2022 – 2025).
